Attorney Docket No. 10541-607

II. Listing of Claims

1. (Cancelled)

2. (Cancelled)

3. (Cancelled)

4. (Cancelled)

5. (Cancelled)

6. (Cancelled)

7. (Currently Amended): A plastics molded part comprising:

a soft-feel section ~~including~~ comprising a sheet of soft material having an inner surface and an outer surface and having a compressed section and an uncompressed section; and

a molded section coupled with the soft-feel section, the molded section ~~including~~ comprising a body and a rim, the body having a first surface, and the rim having an inner surface and an outer surface;

wherein the first surface of the body is in contact with the inner surface of the soft-feel section, the inner surface of the rim is in contact with the outer surface of the soft-feel section, and the first surface of the body and the inner surface of the rim are configured to compress the compressed section of the soft-feel section;

wherein a first distance is the distance between the first surface of the body and the outer surface of the uncompressed section measured perpendicularly from the first surface of the body, a second distance is the distance between the first surface of the body and the outer surface of the rim measured perpendicularly from the first surface of the body, and the first distance is ~~about the same~~ at least as great as the second distance.

8. (Previously Presented): A plastics molded part as in Claim 7, wherein the outer surface of the uncompressed section is substantially flush with the outer surface of the rim.

Appln. No. 09/932,815

Attorney Docket No. 10541-607

9. (Previously Presented): A plastics molded part as in Claim 7, wherein the first distance is greater than the second distance.

10. (Previously Presented): A plastics molded part as in Claim 7, wherein the molded section is an injection molded section.

11. (Previously Presented): A plastics molded part as in Claim 7, wherein the sheet of soft material includes a foam material.

12. (Previously Presented): A plastics molded part as in Claim 7, wherein the sheet of soft material is a laminate with a layer of foam between two flexible webs.

13. (Previously Presented): A plastics molded part as in Claim 12, wherein the flexible webs include a thermoplastic olefin material.

14. (Currently Amended): A plastics molded part comprising:
a soft-feel section including comprising a sheet of soft material coupled with at least one flexible web; and
a molded section coupled with the soft-feel section, the molded section including comprising a body and a rim;
wherein the body and the rim are configured to compress a compressed section of the soft-feel section.

15. (Previously Presented): A plastics molded part as in Claim 14, wherein the at least one flexible web includes a first flexible web coupled with a first surface of the soft material and a second flexible web coupled with a second surface of the soft material.

16. (Previously Presented): A plastics molded part as in Claim 15, wherein the first flexible web and the second flexible web are formed of a thermoplastic olefin material.

Appln. No. 09/932,815

Attorney Docket No. 10541-607

17. (Previously Presented): A plastics molded part as in Claim 16, wherein the soft material includes a foam material.
